1.3.1

**Institution integrates cross cutting issues relevant to
Gender, Environment and sustainability, Human Values
and Professional Ethics into the Curriculum**

Academic Year: 2016-2021

Criterion – I- Curricular Aspects [QIM – 1.3.1]

The college, as a unit, follows a system that inculcates the cross-cutting issues related to Gender, Environment and Sustainability, human Values and Professional Ethics into curriculum. The syllabuses of Science, Humanities and Commerce have all the above said topics in its curriculum. The students are taught these topics with equal vigour along with other contents. Apart from the regular teaching on these issues, the college has other mechanisms to address them.

After admissions, gender audit is carried out every year. On an average the college has almost equal male-female student ratio. “Vishakha” a committee dedicated for welfare of women, works effectively to look into the issues of harassment of girls and female staff, if any. The health awareness programmes also are carried out every year in college. Biochemistry and Microbiology departments conduct Hemoglobin tests, blood group check-up of girl students and suitable diet plans are suggested. There is a separate and spacious Girls’ common room having sanitary napkin vending machine installed in it. The detailed history of girl students’ menstrual and other health problems is noted down and proper medication is prescribed. To boost the confidence of girl students, women working in various fields from Akola are felicitated on Women’s Day. Workshop on 'Awareness and Training on Sudden Cardiac Arrest' by department of Biochemistry in collaboration with Sath Sevak Foundation and iCARE was also organized.

In third and fourth semester of all faculties, Environmental Studies is a compulsory subject, in which the students get detailed information on the issue of Environment. Apart from regular teaching of this subject, the college conducts various programmes to let student remain more aware of the sustainability of the environment. Every year, the “Forest Conservation Day” is celebrated on 23rd July to make students aware about conservation and protection of forest and its ecological importance. Ozone Day is also celebrated on 16th September and “Wildlife Conservation Week” is celebrated from 1st October to 7th October. At the same time the college follows it practically and has a “Green Campus”. We also have a solar unit installed in college that saves energy as well as money and man power.

As a part of inculcating human values among the students, apart from chapters in syllabus, the students are given information through various platforms and programmes. The N.S.S. and N.C.C units help volunteers and cadets understand the importance of community, its need and problems better. NSS & NCC departments have separate wings for girls. These two units help students develop character, discipline, leadership, secular outlook. The “National Yoga Day” is celebrated every year on 21st June. On 26th September 2018 an “Awareness on Prevention

Criterion – I- Curricular Aspects [QIM – 1.3.1]

of diseases” programme was conducted. Along with this “Women Empowerment Workshop” was conducted at Goregaon Khurd, in which various issues about women empowerment were addressed. Also, almost all departments work on sensitization of various social issues. The Entrepreneurship Cell is of immense help in providing students the professional skills and a platform to explore their creativity.

Syllabus on Environment and Sustainability

24. ENVIRONMENTAL STUDIES**Total Marks : 100****PART-A****SHORT ANSWER PATTERN****25 Marks****1. The Multidisciplinary nature of environmental studies**

- . Definition, scope and importance.
- . Need for public awareness. (2 lecture hours)

2. Social Issues and the Environment

- . From Unsustainable to Sustainable development
- . Urban problems related to energy
- . Water conservation, rain water harvesting, watershed management
- . Resettlement and rehabilitation of people; its problems and concerns.
- . Case studies.
- . Environmental ethics : Issues and possible solutions.
- . Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Case studies.
- . Wasteland reclamation.
- . Consumerism and waste products.
- . Environment Protection Act.
- . Air (Prevention and Control of Pollution) Act.
- . Water (Prevention and Control of Pollution) Act.
- . Wildlife Protection Act.

- **Energy resources** : Growing energy needs, renewable and non renewable energy sources, use of alternate energy sources, Case studies.
 - **Land resources** : Land as a resource, land degradation, man induced landslides, soil erosion and desertification.
 - **Role of an individual in conservation of natural resources.**
 - **Equitable use of resources for sustainable lifestyles.**
- (8 lecture hours)

5. Ecosystems

- **Concept of an ecosystem.**
 - **Structure and function of an ecosystem.**
 - **Producers, consumers and decomposers.**
 - **Energy flow in the ecosystem.**
 - **Ecological succession.**
 - **Food chains, food webs and ecological pyramids.**
 - **Introduction, types, characteristic features, structure and function of the following ecosystem :-**
 - **Forest ecosystem**
 - **Grassland ecosystem**
 - **Desert ecosystem**
 - **Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)**
- (6 lecture hours)

6. Biodiversity and its conservation

- **Introduction - Definition : genetic, species and ecosystem diversity.**
- **Biogeographical classification of India.**
- **Value of biodiversity : consumptive use, productive use, social, ethical, aesthetic and option values.**
- **Biodiversity at global, National and local levels.**
- **India as a mega-diversity nation.**
- **Hot-spots of biodiversity.**
- **Threats to biodiversity : habitat loss, poaching of wildlife, man/wildlife conflicts.**

 - . Conservation of biodiversity : In-situ and Ex-situ conservation of biodiversity. (8 lecture hours)
7. **Environmental Pollution**
- . **Definition**
 - . **Causes, effects and control measures of :-**
 - Air pollution
 - Water pollution
 - Soil pollution
 - Marine pollution
 - Noise pollution
 - Thermal pollution
 - Nuclear hazards
 - . **Solid Waste Management : Causes, effects and control measures of**
 - . **Role of an individual in prevention of pollution.**
 - . **Pollution case studies.**
 - . **Diaster management : floods, earthquake, cyclone and landslides.** (8 lecture hours)

LABORATORY EXERCISE :

Plant Physiology: Major experiment (Any Seven)

1. To study the effect of temperature and organic solvent on permeability of plasma membrane.
2. To study osmotic pressure of cell sap by plasmolytic method.
3. To determine water potential of plant tissue.
4. To determine the path of water (ascent of sap)
5. To determine the rate of transpiration by Ganongs photometer.
6. To determine rate of photosynthesis under varying quality of light and CO₂ concentration.
7. To study the rate of photosynthesis in terrestrial plants with the help of Ganongs Photosynthometer.
8. Separation of chloroplast pigments-by paper chromatography/ solvent extraction method.
9. Separation of amino acids by paper chromatography method.
10. To determine R.Q. using different substrates.
11. To determine the rate of respiration by Ganongs respirometer.
12. To study antagonism of salts.
13. To study phenomenon of adsorption.
14. To study effect of IAA and Gibberellins on seed germination.
15. Test for secondary metabolites- Alkaloid, Phenolics, Tannin, Flavonoids and Lignin
16. To study Endo and Exo-osmosis by egg membrane osmoscope

Plant Physiology: Minor experiment- (Any Three)

1. To demonstrate fermentation.
2. To demonstrate exo and endosmosis
3. To demonstrate transpiration by Bell jar.
4. To demonstrate light is necessary for photosynthesis
5. To demonstrate anaerobic respiration in germinating seeds.
6. To demonstrate the evolution of CO₂ in respiration.
7. To demonstrate the phenomenon of nastic movement with help of *Mimosa pudica* / or *Biophytum sensitivum*.

Ecology: Major experiment (Any Three)

PAPER VIII

ENVIRONMENT AND ECOLOGY

- Unit-I : 1.1. The Environment:
1.1.1 Physical environment;
1.1.2 Biotic environment;
1.1.3 Biotic and abiotic interactions.
12. Habitat and niche:
1.2.1 Concept of habitat and niche; niche width and overlap; fundamental and realized niche; resource partitioning; character displacement.
13. Population ecology: Characteristics of a population; population growth curves; population regulation; life history strategies (r and k selection); concept of metapopulation, demes and dispersal, interdemic extinctions, age structured populations, Diversity Index: Simpson's index, Shannon's index
14. Species interactions: Types of interactions, interspecific competition, herbivore, carnivores, pollination, symbiosis.
- Unit II : 2.1. Community ecology:
2.1.1 Nature of communities; community structure and attributes;
2.1.2 Levels of species diversity and its measurements;
2.1.3 Edges and ecotones.
22. Ecological succession: Types; mechanisms; changes involved in succession; concept of climax.
23. Ecosystem:
2.3.1 Structure and function; energy flow and mineral cycling (CNP);
2.3.2. Primary production and decomposition;
2.3.3. Structure and function of some Indian ecosystems;
2.3.3.1. Terrestrial (forest, grassland) .
2.3.3.2. Aquatic (fresh water, marine, estuarine).

24. **Biogeography:**

24.1. Major terrestrial biomes;

24.2. Theory of island biogeography;

24.3. Elementary idea of, biogeographical zones of India.

Unit III : 3.1. **Environmental Pollution-**

3.1.1. Sources nature and effects of air pollutants

3.1.2. Sources nature and effects of Water pollution

3.1.3. Biodegradation and bioremediation

3.1.4. Biotechnological methods for Management of pollution

32. **Global climate change; Global warming, Global dimming,**33 **Biodiversity-statuses;**

3.3.1. Monitoring and documentation;

3.3.2. Major drivers of biodiversity change;

3.3.3. Biodiversity management approaches,

3.3.4. Economics of Biodiversity

Unit-IV : 4.1 **Conservation biology:**

4.1.1. Principles of conservation; major approaches to management, Indian case studies on conservation/management strategy;

4.1.2. Sanctuaries and National Parks,

4.1.3. Project Tiger,

4.1.4. Biosphere reserves.

4.2 **Toxicology**

4.2.1. Metabolism & effects of Organochlorine, organophosphate and carbamate pesticides

4.2.2. Metabolism & effects of alkaloids, barbiturates, alcohol & cyanides.

4.2.3. Metabolism & effects of heavy metal salts.

4.2.4. Formation & effects of free radicals.

4.2.5. Biochemistry of Detoxification – Phase I & phase II reactions.

Unit-V : 5.1 Environmental Monitoring:

5.1.1- IGPCCE (Inter Government Policy/ Protocol for Climate change)

5.1.2- EPA (Environmental Protection Agency)

5.1.3- Laws, legislation pertaining to environment

5.1.4- Control, monitoring & surveillance of environment.

5.1.5- IPR (Intellectual Property Rights) ; Patents need how to obtain in India & abroad, patent offices in India.

5.2. Environmental Impact Assessment Processes:

5.2.1. EIA of reservoirs and Coal mines, thermal Power stations

1. Detection of carbohydrates in a given sample
- Molish test.
2. Estimation of the concentration of reducing sugar
- Benedict's Test.
3. Demonstration of breakdown of starch to monosaccharides
with Hydrochloric acid.
4. Detection of proteins using colour reactions.
 - Biuret test
 - Xanthoproteic test
 - Million's test.
5. Detection of fats using-
 - Solubility Test
 - Emulsification
 - Bromine Water Test
 - Saponification
6. Detection of Iodine from salt.
7. Estimation of Vitamin C in a given sample.
8. Estimation of Iron in a given sample.

Objectives :- To make students aware of Environment and Ecology.**Theory**

25

- Unit-1 :**
- Introduction :- Meaning and definitions of ecology and environment, scope of subject, dimensions of environment, land, air, water, forest, habitat, population.
 - Environmental Education :- Meaning, need, objectives & types. Role of Government, N.G.O's and Educational institution.
- Unit-2 :**
- Human Rights.
 - Land :- As a resource, energy and mineral resources. Land pollution – Sources, smelting, mining, industrial waste, domestic waste, agriculture. Major health hazard. Prevention and control.
 - Water:- Utility of water, water pollution and scarcity. Pollutants, health hazards and their control.
- Unit-3 :**
- Forest :- Utility of forest and forest resources, deforestation and its impact. Forest conservation.
 - Wild Life :- Endanger of species. Wild life preservation programmes, sanctuaries.
- Unit-4 :**
- Energy – Major sources of energy -- Definition and classification.
 - Non-renewable energy sources – Coal Natural Gas, mineral oils, radiological substances.
 - Renewable energy sources – Solar energy, wind power, wave power, flux and reflux, Earth Power, Hydro Electricity, Biomass, Biogas.
 - Uncertainties with Non-renewable energy sources.
 - Alternative Energy sources and Energy conservation measures.
- Unit-5 :**
- Basic Gardening – Types of soil, plant nutrients and use of fertilizers (Biofertilizer, Vermicompost). Basic Garden Plants & their classification. Cultivation of oyster mushroom.

Practicals :

- (1) Study of Garden Equipment.
- (2) Chemical characteristics of soil.
Simple test – Mechanical composition of soil.
- (3) Determination of C-O-D & B-O-D in given sample of water.

2) Practical:	50
Total:	150 Marks

ZOOLOGY Paper 4S
ADVANCED GENETICS AND ANIMAL ECOLOGY

UNIT I : Concept of genes.

Mendel's laws of hereditary – Monohybrid – Laws of dominance, law of segregation. Dihybrid cross – Law of independent assortment. Interactions of genes: , Supplementary factor, complementary factor, duplicates factor, inhibitory factors, and lethal factors – dominant and recessive.

UNIT II : Linkage - Types of linkage, linkage group, arrangement of linked genes, and significance of linkage.

Crossing over – Mitotic and meiotic crossing over, Mechanism of crossing over, theories of crossing over – Darlington's theory, breakage and exchange theory, and copy choice theory. Types of crossing over – Single, double and multiple crossing overs. Factors affecting crossing over, Significance of crossing over.

Multiple alleles. Multiple alleles in relation to eye color in *Drosophila*. Blood group in man, Erythroblastosis foetalis

UNIT III : Sex determination: Autosomes and sex chromosomes, Sex determination in animals, Chromosomal Theory. Genic Balance Theory. Environmentally and hormonally controlled sex determination, Gynandromorphs.

Genetic disorders; Sickle cell anemia, , Huntington's chorea. Diabetes mellitus. Non-disjunction: Turner's syndrome, Klinefelter's syndrome, Down's syndrome. Edwrd's

Syndrome, Biochemical genetics; Cystic fibrosis, Phenylketonuria, Albinism, Alkaptonuria, Goiters, cretinism. Sex linked genetic disorders and their inheritance in man; Hemophilia and color blindness.

UNIT IV : Genetic Screening and parental diagnosis: - Parental, Carrier, Predictive, CVS (Chorionic Villous Sampling), Amniocentesis, Gene probe and DNA analysis. Genes in Human Heredity: - Inheritance of eye color. Skin color. Recessive genes and consanguineous marriages Genetic counseling: - Risk of marriages in affected family. Birth control measures (male and female).

Kinds of twins: - Identical, Fraternal, Siamese twins.
.Significance of twins study

UNIT V : Ecology: concept and scope:

Abiotic factors:

Water: Properties, water problem in terrestrial and aquatic habitat. **Temperature:** Temperature range, Temperature tolerance, Effects of temperature on animals. Homeotherms, poikilotherms. Dormancy, hibernation, aestivation & diapause. **Light:** Spectral

distribution, Biological effects of light on aquatic and terrestrial animals: Reproduction, Metamorphosis, pigmentation, vision, photo kinesis, phototropism, photoperiodism, migration.

Biotic factors:

Intra specific and interspecific associations, Predation, parasitism, Antagonism. , commensalisms, mutualism, competition, (Gauze's Principle).

UNIT VI : Ecosystem: Relationship between habitat and ecological niche - Autotrophic and heterotrophic producer, consumer - trophic level - energy flow in an ecosystem - food chain - food web - pyramids - Ecotypes. Homeostasis of ecosystem.

Terrestrial ecosystem: Classification and Biomes, Aquatic ecosystem: Fresh water ecosystem-Lentic and lotic ecosystem,

**General Geology, Physical Geology, Mineralogy,
Crystallography & Field Geology**

- UNIT-I** : General Geology: definition of geology, branches and scope. Earth in the solar system Origin of the earth: Nebular, Planetsimal and Tidal hypothesis, Age of earth: relative and radioactive methods of age determination – U/Pb, Rb/Sr, K/Ar and Carbon-14 method. constitution of earth: crust, mantle and core. Lithosphere, hydrosphere, atmosphere and biosphere.
- UNIT-II** : **Physical Geology:** Rock weathering – physical weathering, chemical weathering and biological weathering. Geological work done by wind, Rivers, underground water and Glaciers.
- UNIT-III** : **Physical geology:** Volcanism: Structure of volcano, products of volcanoes. Types of volcanic eruption, Causes and distribution of volcanoes. Earthquakes: definition, terminology, Elastic rebound theory – causes, effects, magnitude and intensity; Seismogram and Seismograph. Classification of earthquake; Seismic belts of India. Diastrophism – epirogenic and orogenic movements; Stages in orogenic cycle.
- UNIT-IV** : **Mineralogy:** definition of mineral, rock forming & ore minerals, Physical properties of minerals: Determination of specific gravity by Walker's steelyard & Jolly's spring balance. structures of Silicates ,Physical, chemical, optical properties of Feldspar, Mica, Pyroxene, Amphibole, Garnet and Olivine groups mineral groups. Optical mineralogy – Nature of light, Ordinary and plane polarized light; Reflection and refraction, total internal reflection and critical angle; Double refraction - Nicol prism, Becke line Petrological microscope – its parts and functioning. Properties of minerals under ordinary and plane polarized light and between cross Nicol.
- UNIT-V** : **Crystallography** – Elementary idea about crystal structure: crystal, forms, faces, edges, solid angle and interfacial angle and its measurement. Laws of crystallography Crystal symmetry: planes, axes, centre, crystallographic axes. Miller's indices and Weiss Parameters. Classification of crystal in to seven systems with their symmetry elements of normal classes; Cubic, Orthorhombic, Tetragonal, Hexagonal, Monoclinic and Triclinic.
- UNIT-VI** : **Field Geology:** Significance of geological field work, Study of toposheet: numbering, latitude, longitude, scale and conventional signs. Surveying- various types, use and aim- Introduction to surveying equipment's.

5S : GEOLOGY

ECONOMIC GEOLOGY AND MINERAL EXPLORATION

- UNIT I : Economic geology: Introduction, purpose and scope; Metallic and non metallic minerals, ore, ore deposits, gangue minerals, tenor and grade of the ore, Processes of ore formation, types of deposits, distribution of mineral deposits in space and time, metallogenic epochs and provinces, geological thermometers, Classifications of mineral deposits, magmatic concentration deposits, contact metamorphic deposits.
- UNIT II : Sedimentary deposits, hydrothermal deposits (cavity filling and replacement), evaporation deposits, colloidal deposits, residual and mechanical concentration deposits, oxidation and supergene sulphide enrichment deposits, metamorphic and metamorphosed deposits.
- UNIT III : Mineralogy, properties, uses, origin, mode of occurrence, types of deposits, geological and geographical distribution in India of the metallic mineral deposits like gold, iron, copper, lead, zinc, manganese, aluminium and chromite.
- UNIT IV : Mineralogy, properties, uses, origin, mode of occurrence, types of deposits, geological and geographical distribution in India of non-metallic deposits like asbestos, mica, gypsum, barite, magnesite and limestone. Properties, classifications, origin, uses, geological and geographical distribution of coal deposits of India. Origin and migration of oil, oil trap and its types, geological and geographical distribution of Petroleum deposits of India.
- UNIT V : Mineral exploration and prospecting, definition and scope, surface methods of exploration and their applications, sub surface methods of exploration like, gravity, magnetic, electrical, seismic, radiometric, geochemical and geobotanical methods and their applications in Geology.
- UNIT VI : Guides and controls of ore localization, sampling-Its types, calculations and computation of grade and ore reserves, geochemical cycle and dispersal; Strategic, critical and essential minerals.

Practicals

- A. Identification of ore minerals by Physical properties (40 to 60 specimens)
B. Identification of industrial Minerals by physical properties (20 to 30 specimens)
C. Exercises showing major metallic and non metallic minerals on India map (6 to 10 maps)
D. Exercises on calculations on grade and ore reserves (6 to 10 problems)
E. Laboratory exercises in solving exploration problems (8 to 10 problems)

SEMESTER – VI

6S : GEOLOGY

HYDROGEOLOGY, REMOTE SENSING, ENGINEERING GEOLOGY AND GEOLOGICAL SKILL

UNIT I : Concept of hydrology, hydrogeology and ground water, Hydrologic cycle and its components, Occurrence and distribution of ground water, Water Table; Aquifer and its types – confined, unconfined and semi-confined, Properties of aquifer- porosity, permeability, specific yield, safe yields, storage coefficient, storativity and transmissivity.

UNIT II : Recharge and discharge, Cone of depression, Influent and affluent seepages, Springs and its types. Ground water Provinces of India. Geophysical investigations for groundwater exploration, Groundwater and water quality services, Hydrochemical parameters of ground water (Acidity, Alkalinity, Hardness, pH, Conductivity). Recharge through wells and its types. Rain water harvesting,

UNIT III : Aerial photographs and its types, Satellite imageries. Methods of studying aerial photographs in the form of stereo-pairs and mosaic. Pocket and mirror stereoscopes, Overlap and sidelap, Drift and crab. Photogeology and elements of photorecognition- tone, texture, shape, size, pattern; Scale of photograph and vertical exaggeration. Guidelines for lithological, structural and geomorphic interpretations. Applications of photogeology. "Introduction and scope of photogeology".

UNIT IV : Concept of remote sensing, types of remote sensing systems (active and passive), Elements of passive remote sensing system (data acquisition and data analysis), applications of remote sensing in studying the natural resources like minerals, ground water, soil and forests. Satellites and Satellite data - introduction and brief history, types of satellites, information obtained with reference to latest IRS & LANDSAT satellites. Sensors – types and their applications.

UNIT V : Engineering Geology – introduction, scope and significance; engineering properties of rocks - specific gravity, porosity, crushing strength, compressive strength, and tensile strength. Tunnels - terminology, geological conditions for tunnel sites, tunnels in folded rocks and bedded rocks. Dams – terminology, geological conditions for the selection of dam, Types of dams - Masonary dams (Gravity buttress and Arch types), earthen dams. Landslides - causes, types and prevention of landslides.

UNIT VI : Geological skill development - Role of geological expertise in local natural resources investigation, exploration and mining, beneficiation of minerals; Rocks and minerals thin section making, Civil engineering services, Environmental services, . Soil quality testing and conservation services, Laboratory and Research Technician. Geoheritage.

PRACTICALS: SEMESTER – VI

1. Plotting of ground water provinces on outline map of India.
2. Problems on determination of aquifer parameters, ground water table maps.
3. Interpretation of aerial photographs and satellite imageries.
4. Field work : Field work is an Integral part of Geology Syllabus. Every student should attend field work for a short duration and submit field diary, geological specimen collected and a report.

Practical Examination

Practical Examination will be of four hours duration and carries 50 Marks. The distribution of Marks will be as follows,

I. Identification of ore minerals (5 nos.)	10 Marks
II. Identification of industrial minerals (5 nos.)	10 Marks
III. Exercises of metallic and non-metallic deposits of India on maps (2 maps)	4 Marks
IV. Laboratory exercises in solving exploration problems (2 problems)	8 Marks
V. Exercises on calculations and grades of ore reserves (2 problems)	8 Marks
VI. Practical record	5 marks
VII. Viva – voce	5 marks

Total- 50 Marks

National Nutrition Week 2021

The week is observed to raise awareness about health and nutrition. During this week, various initiatives are taken up by the government which totally focuses on good food, healthy body, right nutrition, and lifestyle.

Through these initiatives, people learn new eating habits that can help them to obtain good nutrients in the coming days. As nutrition plays an important role in an individual’s life, it is necessary to have the right amount of nutrition including proteins, vitamins, salts among others in our daily diet.

Theme for National Nutrition Week 2021

This year, the theme for the National Nutrition Week was “feeding smart right from start”. Healthy food habits play a vital role in the growth of an individual and are necessary for overall holistic development and lifestyle. This week was to increase awareness about Nutrition and adaptive eating habits. In India, it is observed that the main reason for organizing the national nutrition week 2021 is that people should recognize the importance of nutritional eating habits so they can properly take care and maintain their healthy lifestyle by eating healthy food.

Despite the ongoing [coronavirus](#) pandemic, the government had established a program to provide correct information and also to raise awareness via camps and seminars regarding the same.

Through this theme, people across the country including children got to know the benefits of a good nutritional diet right from birth. In the week-long campaign, sub-programs such as Healthy Khayega India, Bharat Poshan Premier Quiz and Good Food Talk Show had people of all age groups taking part in it.

The department of Home Science also celebrated the event.

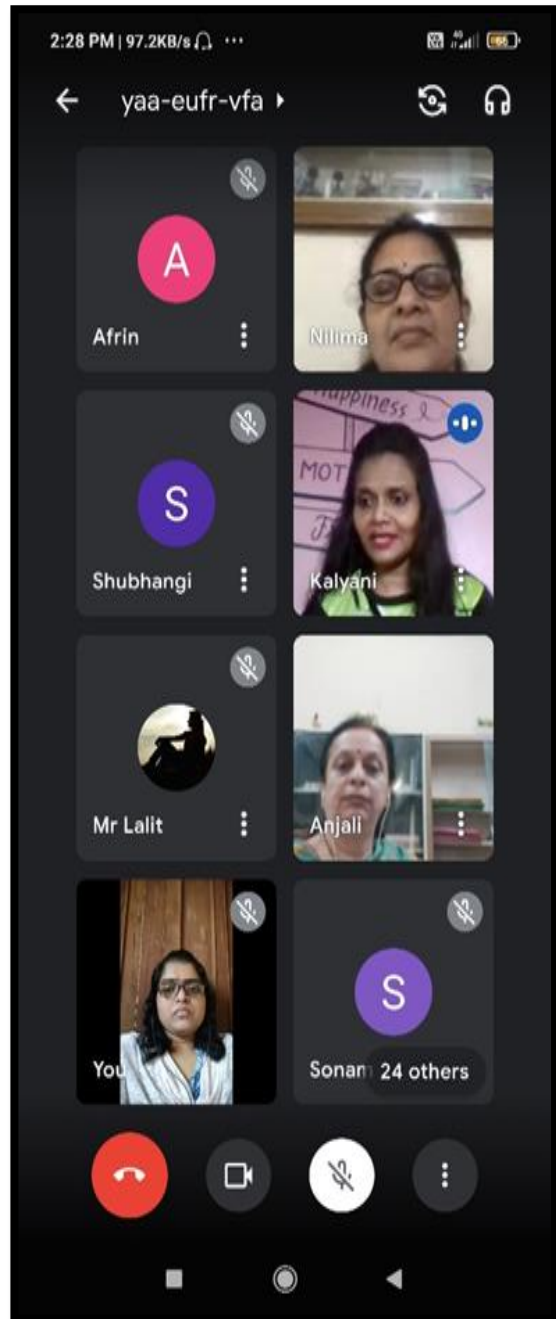

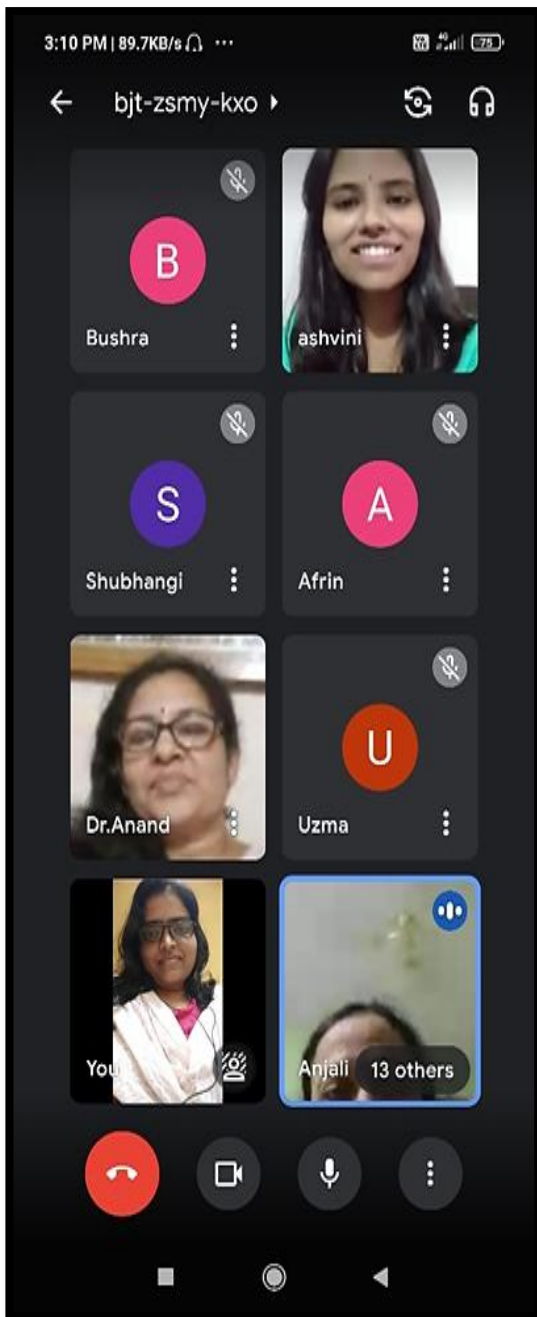

Most of the activities of the National Nutrition Week 2020 celebration were online due to the Covid-19 pandemic situation.

Report on Virtual Celebration of World Wetland Day

Session-2020 – 2021

World Wetland Day (WWD) is celebrated every year on 2nd February for the conservation of wetlands at the global level. Celebrating this occasion of WWD-2021 we organised online programme at Department of Botany, Shri Shivaji College of Arts, Commerce and Science, Akola under the theme “*The fresh water wetland*”. *Fresh water is burning now a day. The rate of ground water extraction is in inverse proportion to water refilling. Anthropogenic activities have polluted most of water reservoirs and now it is extreme moment to stop polluting and start restoring them.* Keeping in mind the current scenario of water resources around us, we organized online “**Inter-university Wetland Photography Competition**” for Students & faculty members of UG, PG of various colleges to celebrate the WWD. More than 89 participants participated in this event.

The aims & objectives are

- to raise global awareness about the vital role of wetlands for people and our planet among the students,
- To spread the information about the protection and love for wetlands.
- Bring some activity about ecological health in abundance to not only water bodies but environments as a whole.
- By celebrating this day, we can recognize this dilemma before the loss of a natural filter and conservator of the world because many wetlands are being lost.

On this occasion our Chairperson Prof. Dr. R. M. Bhise Principal of our college delivered a talk on sources of wetlands and its importance in these areas.

The Programme was started with an introductory talk by Dr. Dr. P. P. Umale Professor & Head, Department of Botany. In her talk she emphasized on departmental development which takes place since the date of establishments. She talked about various efforts being made by departmental ex head and various activities taken for departmental development. She also focuses on the conservation of wetlands and explained about the importance of wetlands and their vital functions, values.

In the next lecture, Dr. V.S.Patil gave the introduction of Resource person Dr. Yayati B.Tayde Associate Dean, Department of Forestry Dr. Panjabrao Deshmukh Krishi Vidyapeeth, Akola. Dr. Tayde delivered a talk on “**Wetlands and its socio-economic and ecological importance**” in which he showed various lakes and wetlands of the region and various unique flora and fauna that depends upon these wetlands. He focused on the biotic and abiotic components of the lake, river, pond ecosystem and their interactions making a food web. He explained students that how deterioration of lake, river, pond, stream, water affects the phytoplankton and zooplankton diversity and they turns into eutrophic one. He emphasized on the conservation and protection of catchment area for a healthy wetland ecosystem and pointed out that the wetlands are important for retaining water during dry periods, thus maintain aesthetic beauty and biodiversity that has a strong link with sustainable urban future. He gave guidelines for protection, conservation of water bodies, to keep away the pollution and maintain this natural asset.

For creating awareness among the students regarding conservation of wetlands for the future we organized “**Inter-university Wetland Photography Competition**” on same day.

In these creative activities students, & faculty members participated enthusiastically and batches of three different categories i.e.UG, PG, & faculty were made for winner of the competition among them on the above mentioned topics. The various activities performed by the students were judged by the teachers DR.Sanjay Satpute, Assistant Professor, Mahatma Fule Arts, Commerce & Sitaramji Choundhari Science Mahavidyalaya Warud &Dr.Hemant Spkal, Associated Professor Department of Zoology Shri Shivaji College of Arts, Commerce &Science Akola. Result was declared by Dr.Rasika Patil. Winners as well as participants of these competitions were given e certificate by the department.

The programme concluded with a Vote of Thanks given by Dr.Anand Oke . For this pregame large affords were taken by Dr.D.K.Koche, Dr.Prashant Deshmukh, Mr.Shubham Rathod, Mr.Nikhil Chaukhande, Miss.Isha Rajput, Mr. Gopal Dhobale &Mr.Nilesh Sonone.

A Report
On
World Breast Feeding Week

Department of Home science
Shri Shivaji College of Arts, Commerce & Science, Akola.

Breast feeding is not only the cornerstone of a child's healthy development: it is also the foundation of a country's development."UNICEF & WHO WBW message

Breast feeding gives all human beings the opportunity to have a fair start in life.

1st August to 7th August every year is celebrated around the world as Breast Feeding Week to encourage breast feeding and improve the health of babies around the world.

Importance of breast feeding:

Mother's breast milk helps keep the baby healthy. It supplies all the essential nutrients in the proportions. It protects against diseases, like diabetes and cancer. It is easily digested – no constipation, diarrhoea or upset stomach in baby.

Advantages of Mother's milk:

- 1) Higher content of ascorbic acid and iron.
- 2) Higher content of polyunsaturated fatty acids.
- 3) Higher content of cystine in proteins..
- 4) Low mineral content and low buffering capacity.
- 5) Less load on the kidney.

The Department of Home Science, Shri Shivaji College of Arts, Commerce & Science, Akola celebrates the Breast Feeding week every year to spread awareness about breast feeding and its importance for child's and mother's health.

Here is a report of the celebration.

Glimpses of OZONE Day Celebration By Department of Zoology

2020 - 21

Earth Without Ozone is like a house Without a roof

What is Ozone?

- A gas consist of three atoms of oxygen (O_3)
- Present in stratosphere and referred as ozone layer.

Ozone Depletion

- Ozone layer depletion is simply wearing out of the amount of ozone in stratosphere Unlike pollution which has many types and causes ozone depletion has been pinned down to one major human activity
- Industries that manufacture things like insulating foams, soaps, solvents, cooling things like AC, refrigerators and "Take-Away" containers use something called chlorofluorocarbons (CFCs)

Measures To prevent The Ozone Depletion

- 1) Limit private vehicle driving
- 2) Use eco-friendly household products
- 3) Avoid using pesticides
- 4) Banning the use of dangerous nitrous oxide
- 5) Developing stringent regulations for rocket launchers

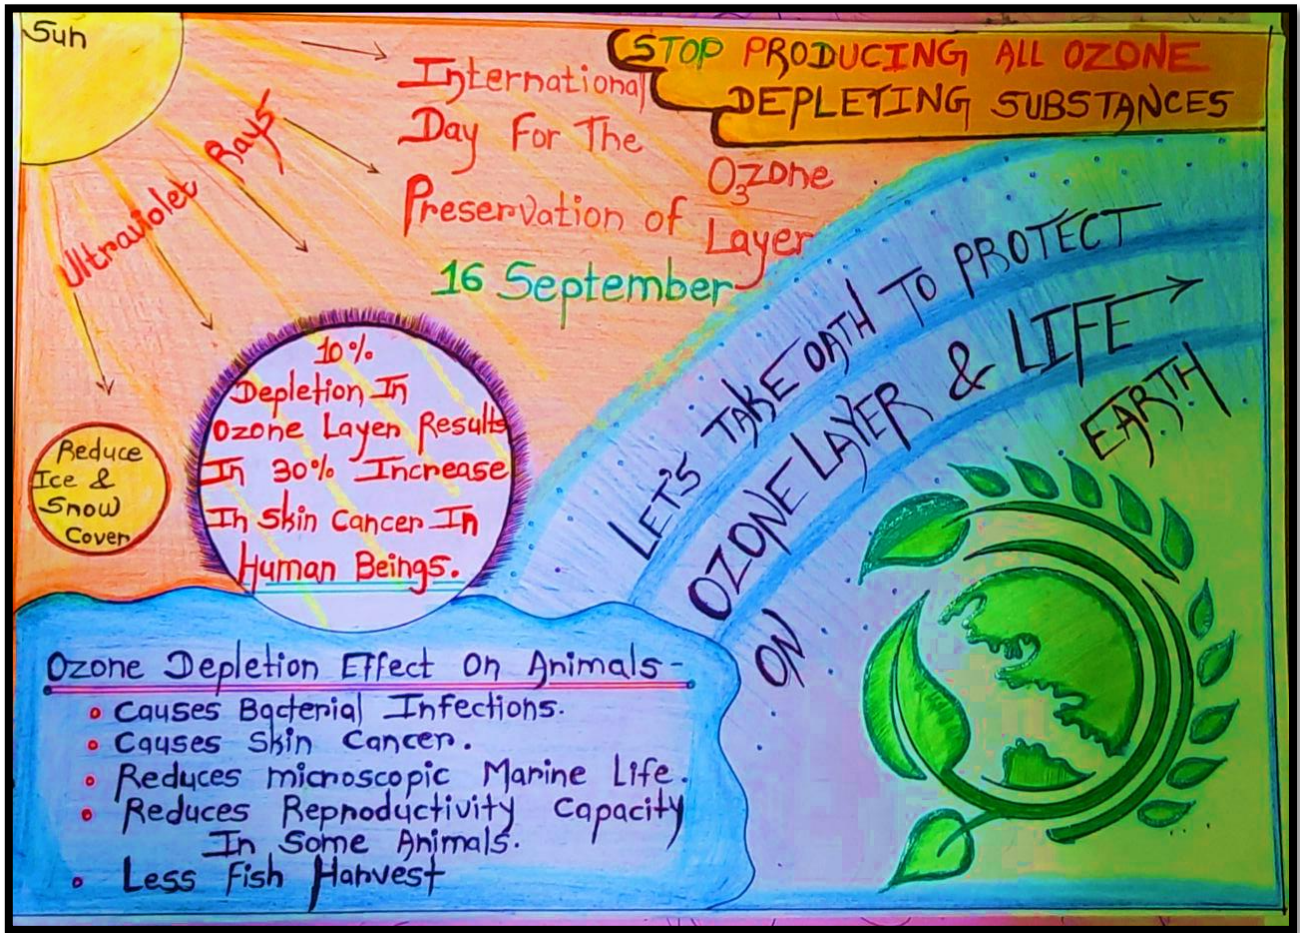

Cause of Ozone Depletion

- 1) Chlorofluoro Carbon (CFCs)
- 2) Halons
- 3) Methyl chloroform
- 4) Hydrofluoro Carbon (HCFCs)

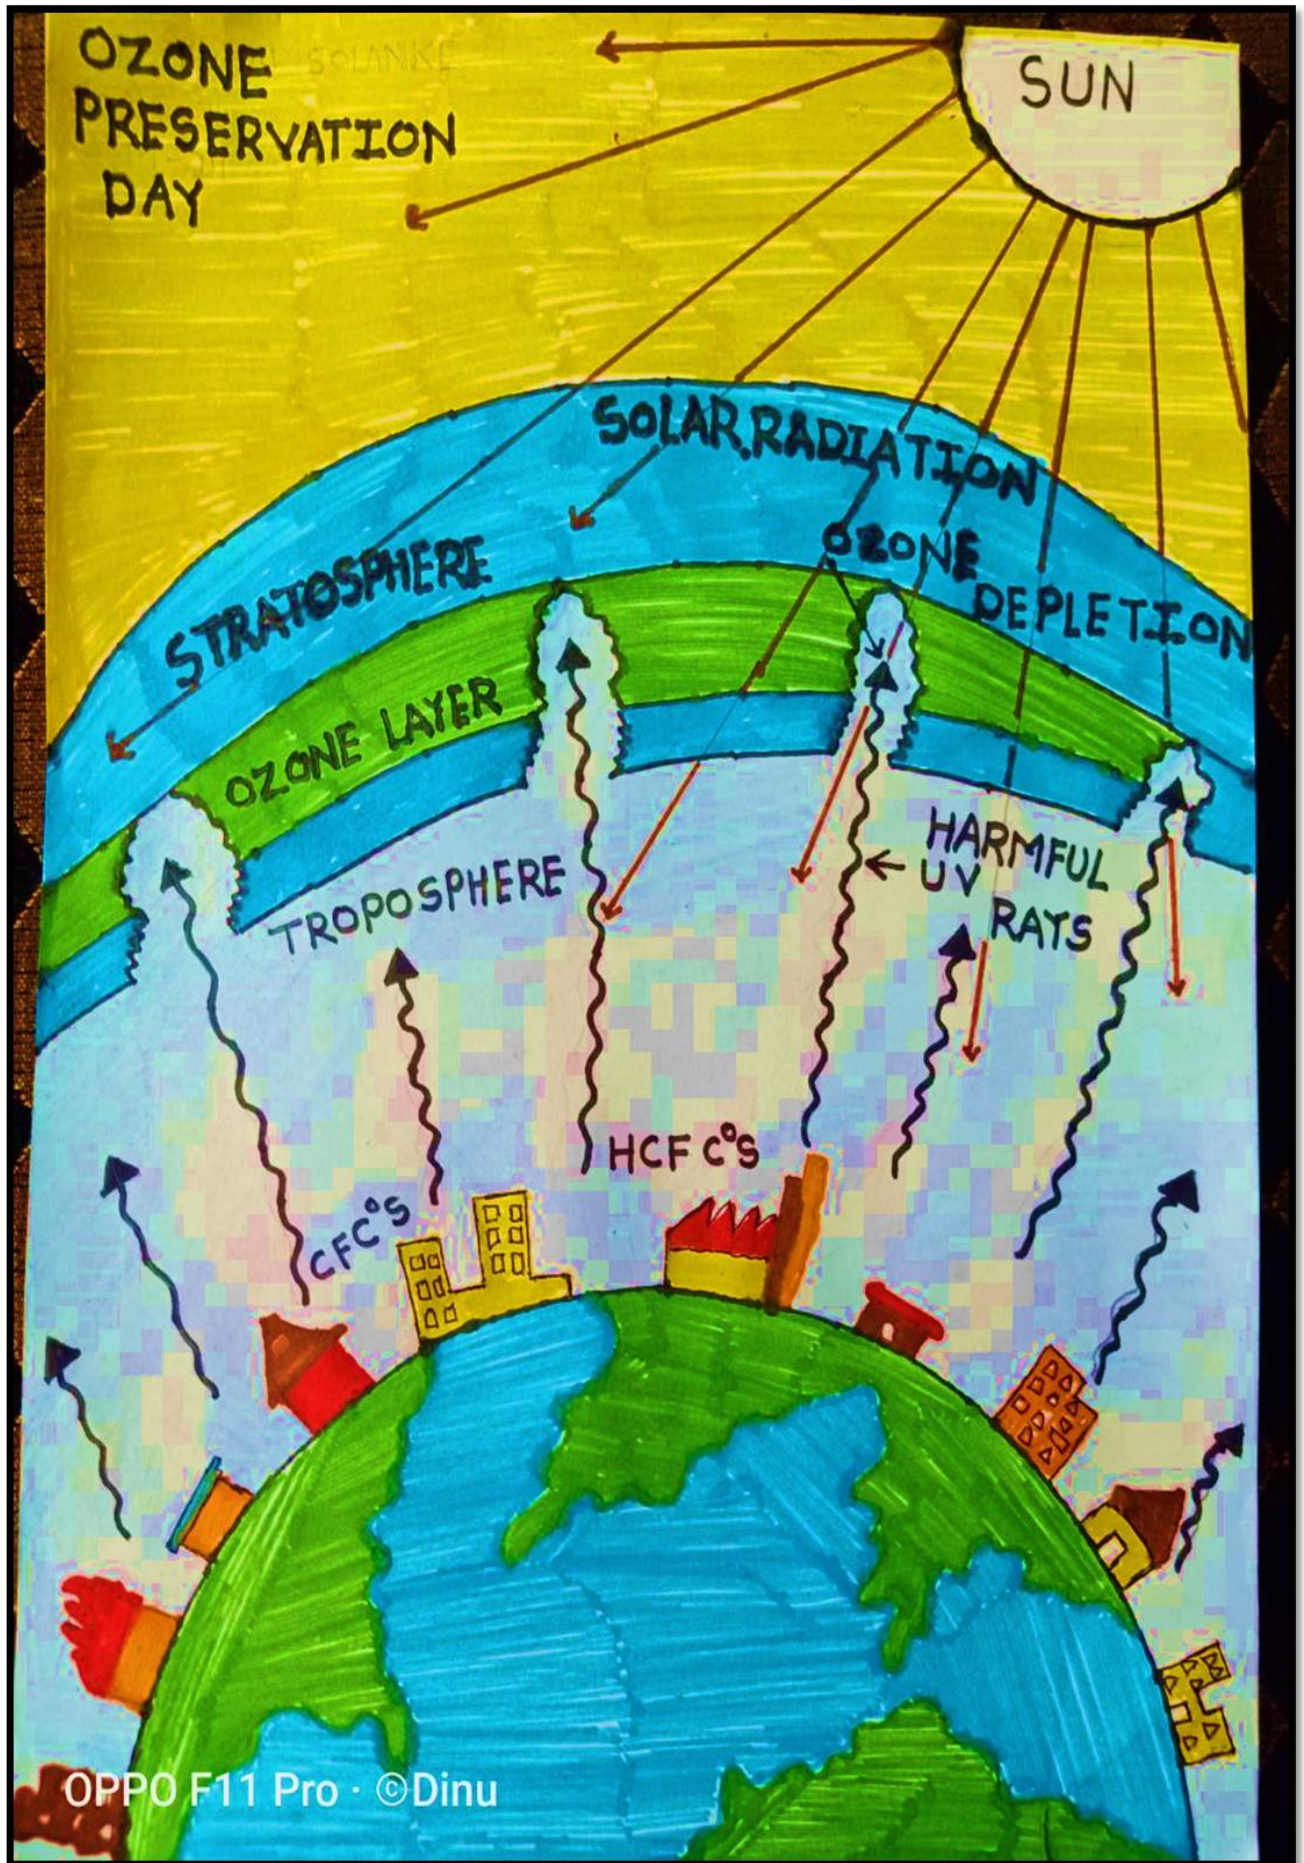

Impacts Of Ozone Depletion

- 1) **Harm To Human Health**
 - Skin Cancer, Sunburns, Premature aging of the skin, blindness
- 2) **Effects On Animals**
 - In domestic animals UV rays cause eye and skin cancers

REPORT ON ONE DAY
VIRTUAL WORKSHOP ON
ORGANIC FERTILIZERS:
A MIRACLE OF NATURE.

Session 2021

India is agricultural country. The increased consumer demand appears to be driven *primarily* by the perception that organically grown produce was safer and more nutritious than produce grown conventionally. The use of inorganic fertilizer has been observed to cause the destruction of soil texture and structure, which often leads to soil erosion and acidity as a result of the leaching effect of nutrients. All these give rise to reduced crop yields as a result of soil degradation and nutrients imbalance. Manure soil had higher organic matter levels, lower bulk density, higher porosity and hydraulic conductivity, and greater aggregate stability than soils fertilized conventionally. Improvements in all of these soil quality indicators would optimize crop growth. Thus, one of the most significant benefits of manure as an organic nutrient source was the potential to maintain or increase soil organic matter levels.

Organic fertilizers mainly are “faecal material/manure and urine from different animals and/or humans, with the addition of plant materials (organic solid wastes), or in special situations waste materials from food or plant processing industries”, the origin of the different fractions. It is more environmental friendly than the inorganic fertilizers and its effect more tender on biotic components of the ecosystem without much shift in the ecological balance.

In India low-cost options for pathogen reduction and nutrient recovery from faecal sludge are of special importance. Organic fertilizers are made with natural raw material; it usually pertains to our biodegradable wet suit. Usually compost is made by decomposing biodegradable wastes. These wastes include paper, leaves, fruit peelings left over foods and even fruit juices. Organic fertilizers make a good addition to the soil. It makes the soil rich and ideal to planting.

So keeping this idea in mind, in this year we organized One day **virtual** workshop on **preparation of Organic Fertilizers** for UG & PG student's on 01-08-2021 at Botany Department. 275 students participated in this virtual workshop.

The main aim & objectives of our Department is to

- Spread importance of organic fertilizer and. Planning, promotion. Development of the fertilizer industry among the students.
- Enhance biological diversity within the whole system
- Increase soil biological activity
- Maintain long-term soil fertility
- Recycle wastes of plant and animal origin in order to return nutrients to the soil, thus recycling the use of non-renewable resources

REPORT Online Celebration of “Forests Conservation Day”

on
23rd July 2020

The problem of deforestation and urbanisation seems to be plaguing the world for quite some time now. Many environmentalists and activists are working relentlessly to conserve forests and the animals. In an attempt to save forests and create awareness about the same, our department has started celebrating “**World Forest Day**” every year on 21st March. The basic aim to celebrate this programme is to make student aware about the importance of Plants and forest, its conservation and also to create interest among the students. The different competitions were organised & celebrated during this period.

Our aim is to encouraged students in activities like planting trees to spread awareness about different kinds of forests and their importance as a part of the ecological balance.

On the celebration day Dr.P.P.Umale Professor and Head imparted welcome speech by introducing our department.. Dr.V.S.Patil share knowledge about ‘why do we celebrate this day’ as ‘Forest conservation Day” with the students. Dr.A.S.Raut Professor and IQAC co-Ordinator gave his best wishes for this programme and also add significant note on importance of forest.

Chairperson Dr.R.M.Bhise in his speech discussed about forest resources and its importance as a part of sustainable forest management.

Guest of honor Dr.Tukaram A.Gitte Assistant Professor & Head Department of Botany, Vaidyananth College, Parali – Vaijnath, Dist. Beed interact with students by showing ppt on forest conservation.

On this occasion chief guest Dr.Sudeep Ray Professor Department of Botany, P.M.B.Gujarati PG Science College,

Indore (MP) showed ppt on importance of forest. In the month of rainy season many students and faculty of Botany Department eagerly participated in activity of plantation of trees in college as well as surrounding areas of their houses. A short video clip was run by Dr. Rasika Patil on this activity during the programme. This showed determination by adopting one tree each as a token contribution for conservation.

On this occasion inauguration of “Seed Bank” was also done by chief guest. For this event Dr. Prashant Deshmukh had taken an extensive effort to make this activity successful.(For more detail see on you tube link <https://youtu.be/ZEWQMB03DS8>)

A motivational activity was taken by participating poster, craft and literature section both by students as well as faculty members by various colleges. These activates purely based on conservation of forest. More than 127 students and faculty members made their posters, craft, essay (in English, Hindi and Marathi language) send online to the Department through which 1st, 2nd 3rd and consolation prizes were selected by jury members.

A lot of efforts taken by Dr. D.K.Koche, Mr.N.B. Choukhande, Mr. S. A. Rathod, as well as Mr.Gopal Dhobale, Mr.Nilesh Sonone, Mrs.Isha Rajput, all non teaching staff for running the programme successfully. All students of UG, PG and faculty members of different colleges actively participate in this event and made it a grand success.

Report on Exhibition

“Best out of Plant Waste”

Report on “Best out of Plant waste” Exhibition

Objective:

- 1) To aware the students about plant waste.
- 2) To explore the creativity of the students from plant waste.

Exhibition was organized on 17 September 2019 in **Botany department** wherein students showcase static and working models which can be used for learning various scientific concepts for students of BSc and

MSc. The objective was not only to inculcate a scientific attitude and research temperament also creating some innovative ideas. It involves students to participate in activities so as to understand the cognitive, affective and psychomotor aspects of the task.

Students from the Botany Department participated in these activities which are made from plant waste. They had chosen topics from the internet, from science books and with teacher discussions. Students had made still models, working models, charts, posters and products to present their topics.

For this event Chairperson Dr.R.M Bhise Principal of Shri Shivaji College, Akola, Chief Guest Mrs. Archana Pardeshi Director, Jan Shikshan Sanshthan, Akola, and Guest of Honor, Dr. Ashish Raut IQAC coordinator inaugurated the exhibition. After inaugurating the event Dr. V. S Patil focused on the Aim and objective in her introductory speech. Afterwards chief Guest Mrs. Archana Pardeshi motivated the students to work towards the development of the various products leading to the commercialization of products which in turn has to develop entrepreneur skills of the students. Guest of Honor Dr. Ashish Raut took the initiative of encouraging the students to put up such a wonderful and enlightening exhibition. Guest of Honor Dr. R.M Bhise highlighted the importance of innovation and industries-oriented projects.

The judges Dr. D.D. Bhokare Associate Professor Dept. Of Microbiology, Dr. Sharayu Thorat Assistant Professor Dept. of Chemistry

appreciated the students. They ask students about the scientific forming, the foundation of the models. Students had prepared models like water purification, biogas, ethanol preparation, dyes preparation, soap, perfumes, etc. from plant waste. There were about 60 projects that were exhibited from students.

On prize distribution ceremony Dr. Sanjay Khadatkkar Head of Statistic Dept. and Dr. Swati Zodpe Dept of Microbiology distributed prizes among the students. There were seven prizes and three consolation prizes given to BSc, MSc and Jan Shikshan Sansthan students. Dr. Khadakkar sir appreciated the student's model which was a very unique one. Lastly students of MSc first year gave vote of thanks to our beloved Honorable Principal Dr. R.M BBhise for gracing the occasion and also providing all the necessary facility and support for the conduction of the event. He also thanks Chief Guest Mrs. Archana Pardeshi for their support and motivation. He also thankful to Dr. Ashish Raut IQAC coordinator, Dr. Archana Pethe Head of Microbiology Dept., Jury members, Dr.D.D.Bhokare, Dr. Sharayu Thorat ,Dr. P. S Kokate Head of Botany Dept, Dr. Khadakkar Head of Statistic Dept, Dr. Swati Zodpe Assistant Professor Microbiology, Dr. D.K. Koche, Dr. V.S. Patil Associate Professor Botany Dept. for their constant support and guidance. At last he also thanks all staff of Botany Dept and students for their active involvement and support.

From this exhibition we encourage the students to develop a scientific

fervor and an attitude of research so that they can develop the qualities of analytical and critical thinking. It also focuses the light to work towards the development of the products.

Outcome: In the exhibition, various articles prepared by the student participants were displayed. From the overall response, it could be stated that the students get the motto behind this organization and also learn that the plant waste could be utilize for making various useful artifacts.

Research Methodology Workshop

On Dated 20 August 2021

The Hitavada

— THE PEOPLE'S PAPER • SINCE 1911 —

Research methodology coursework from tomorrow

■ **District Correspondent**

AKOLA, Apr 30

A COURSEWORK in Research Methodology which has been made compulsory by Sant Gadgebaba Amravati University as per the norms of UGC will begin at Shri Shivaji Arts, Commerce and Science College here from May 2.

The college has been the only research centre in the university with the largest number of enrollment for Ph D programme, informed Dr Rameshwar Bhise Principal.

Talking to *The Hitavada* Dr Bhise said every Ph D scholar has to undergo the Ph D Course Work in Research Methodology designed by the SGAU as per the guidelines and norms laid by the UGC. The university has recognised research centres where the Ph D aspirants have enrolled their names for the programme. The Research Centre at Shri Shivaji College here has 100 scholars across the State on its roll for Ph D programme. The college has

taken initiative in starting the Ph D course work very soon after the enrollment.

The last date for research centres to finalise the enrollment was April 15, he said.

Dr Rameshwar
Bhise

Around 51 students have enrolled from Science stream, 38

from Humanities, 06 from Homescience and 05 from Commerce and Management. The syllabus consists of Module-1 (Research Methodology), Module-2 (ICT Skills), Module-3 (Recent Trends in the subject), Module-4 (Review of Literature) and Module-5 (Seminar for all faculties).

The coursework will begin from May 2. Dr Upadhye will inaugurate the course while Dr Rameshwar Bhise will preside over.

Dr G V Korpe Chief Research and Extension, Dr Ashish Raut IQAC Coordinator will be chiefly present on the occasion.
