**Report of
4 Days Workshop on “Android Application Development”
(11-14 Feb. 2019)**

Objective

Majority of the hand-held devices runs on the Android Operating System. Android operating system is open-size and customizable. Android Application development workshop aims at providing technical training on the concepts and programming methodologies used to develop various Android Applications. By participating in this workshop, students will learn to develop applications in the latest operating systems with practical implementation and begin managing your own applications like a professional at this workshop. This workshop will allow students to grasp the concepts of the complete mobile application development.

Outcome: Participants were given hands on training about android application development.

Workshop Structure:

Module I: Introduction to Android Application

- Session: 1
- Understanding What Is Android?
- Installing the Android SDK.
- Understanding Android Stack Architecture.
- Implementing Hello World Application.

Module II: Android Features & Blocks

- Session: 2
- Understanding Main Building Blocks.
- Understanding Intent Filters in Android.
- Working on and preparing Android User Interface.
- Understanding android apps building.
- Designing an application.

Module III: Introduction to Android Layouts

- Session: 3
- Understanding Android Layouts & Menus.
- Creating Android Toast.

Module IV: Designing User Interfaces.

- Session: 4
- Understanding sensors in Android.
- Work with your Android Phone.

Module V: Android Broadcast Receivers & Graphics

- Session: 5
- Understanding and implementing Broadcast Receivers.
- Designing Android Graphics and Multimedia.
- Media Player Application using Content Provider.

Module VI: Overview of Advanced Android Topics

- Session: 6
- Android Asyc Task.
- Android web services.
- Android Online Apps.
- Targeting multiple resolutions.

Subject: Request to organize Workshop on "ANDROID Mobile App Development" for 3 days.

Respected Sir,

We as a Microspectra Software Technologies Pvt. Ltd. Shegaon(Maharashtra) is Software development and training Provider Company in IT sector. We conduct the technical workshop, International Certification Training Program, other Recent Technology oriented training for engineering students & faculties on recent technologies present in today's IT market.

I request you to organize a Workshop on "ANDROID Mobile App Development" for BSc and MSc Students of Computer Science and Electronics departments of your college.

Kindly find herewith detail proposal of the workshop.

Waiting for positive response.

**Report of
3 Days Workshop on “Internet of Things”
(20-22, Feb-2019)**

Brochure of the workshop

Full Three Days

Workshop on “IoT Using Arduino and Raspberry Pi”

6 Hours/Day

What is this course about?

Internet of Things, or IoT in short, is the idea of making devices and objects smarter by linking them to the internet. With IoT, you could for example have a fridge notify you when there's no milk. IoT has promising applications for smart homes, wearable devices, smart cities, connected cars and more.

This course introduces you to the amazing world of IoT and its fascinating applications. Using a Raspberry Pi computer and other sensors, you will develop an electronic device that streams data over the internet. Apart from gaining practical skills on the Internet of Things, by doing this project you will learn about the Raspberry Pi development platform which is popular among people who love innovative projects.

Course Outcomes

- Learn the basics of Internet of Things and its applications
- Build your computer using Raspberry Pi platform
- Work with different sensors
- Setup IoT connectivity using a remote desktop
- Understand Raspbian OS, Python programming, SMTP and API
- Develop and test an IoT weather monitoring station

Kit Content

- Raspberry Pi B+ model
- Arduino Uno Board
- Ultrasonic sensor, LDR, LM35,PIR
- Resistor
- Breadboard
- Connecting wires

- Ethernet cable(LAN) and MicroUSB cable *
- microSD memory card and SD memory card adapter *

Course Contents

Day 1:

1. Introduction to Raspberry Pi
2. Hardware & Interfacing
3. Embedded Linux Basics
4. Preparing SD card installing Raspbian OS
5. Python Basics
6. First Python Code on Raspberry Pi
7. Start Project With Raspberry Pi
8. Raspberry Pi GPIO Basics
9. Controlling External Circuit With Pi
10. Reading Input Using Pi GPIO pins
11. Interfacing Sensors
12. Remote Access and Remotely Controlling Raspberry Pi

Day 2:

1. Introduction to Microcontroller and Microprocessor
2. Arduino board Layout
3. Getting started with Arduino IDE to write programs
4. GPIO Interfacing
5. LED Blinking(digital output)
6. Switch(digital input)
7. Serial output(print) and input(read)
8. The basic usage of the Arduino environment for creating your own embedded projects at low cost.
9. How to connect your Arduino to your Android phone through Bluetooth
10. Controlling Relay Switch from Android App
11. Control a Relay Switch by texting from your Phone.
12. LDR Sensor interfacing with Arduino

Day 3:

1. Automatic Street Light
2. Working with LM35
3. Working with Ultrasonic Sensor
4. Working with PIR Sensor
5. Controlling devices and appliances using Web page.
6. Designing SMS API(Sending Messages through IoT)
7. Designing Email API(Sending Messages through IoT)LDR Sensor interfacing with Arduino
8. Working on home automation module through telegram.

Sub: Regarding Workshop for the UG & PG- student of Computer Science.

Resp. sir,

We are going to organize three-day workshop on the IOT for the UG & PG students, research students and faculty. The estimated cost of per student is Rs.800/- that would be borne by the students.

Please consider the above proposal to conduct three-day workshop that would be beneficial for the students for upcoming technologies & that would be the need of today's development & helpful for the research students & encourage the students to participate in a science exhibition like AVISHKAR & padmabhushan Dr. Vijay Bhatkar gaurav mahoutsav.

Yours faithfully
